PRODUCTION TECHNOLOGY

- Cutting speed increased by up to 20% in comparison with OEM parts.
- Production processes have been adapted to achieve the best quality of flutes and oxygen orifice with regard to this consumer item.
- There is also special covering of heating nozzle to improve service life of this consumables.
- Against competition we modified some dimensions to improve function and quality of kerf.
- Every new prototype is ranked into hard testing process. Only after this process the cutting nozzles will be available to customers.

WHY SHOULD YOU COOPERATE WITH THERMACUT?

- Our products are manufactured on latest generation of CNC equipment, and products are equal to OEM quality, but are available at a more reasonable cost.
- Our experienced international engineering development team and technicians also allows Thermacut to completely guarantee its products.

This approach has made Thermacut one of the most successful companies in the replacement of thermal cutting consumables and torches worldwide.
